

**Tedd Wood, Inc. is proud to offer Nature's Collection, a line of healthy, green cabinetry.**

As environmental stewardship has been gaining momentum on a national level, Nature's Collection is just one more step we have taken towards deepening our roots to being an increasingly faithful guardian of the environment. We recognize that we have a unique responsibility to be good environmental stewards. Our industry is resource-intensive, requiring large quantities of wood and energy. We understand the necessity for protecting and preserving these resources for other uses, future customers and generations to come.

**As we come to the greening of our nation, Tedd Wood is holding the cabinet industry to a higher standard.**

Tedd Wood has carefully built its reputation on uncompromising performance in materials, craftsmanship and service. Developed on these same principles, Nature's Collection not only meets KCMA's standards for their Environmental Stewardship Program, but reaches beyond in a manner set by few in the cabinet industry. We are pleased to unite our name with FSC certification and LEED compliance. This stewardship also continues in our manufacturing practices: waste wood for energy, scrap wood reclaimed for local projects, wood by-products for animal bedding, supplemental lighting with natural resources, use of recycled and responsibly produced papers, recycled waste paint for a cleaning agent, as well as other environmental friendly practices.

**Nature's Collection** offers a wide array of green options, including but not limited to:

- ☛ FSC Pure and FSC Mixed logos available through our Chain of Custody (CoC) number SW-COC-002924; verification at [www.fsc.org](http://www.fsc.org)
- ☛ Environmental friendly substrates with no added urea formaldehyde
- ☛ Sustainably harvested wood interiors
- ☛ Wood-edge banding instead of PVC
- ☛ Water-based and low VOCs (Volatile Organic Compounds) finishes
- ☛ Reconstituted and composite wood veneers
- ☛ Sustainably harvested solid wood frames
- ☛ FSC certified materials
- ☛ Eco-friendly wood alternatives (i.e. bamboo)
- ☛ Non-toxic glues
- ☛ Recycled components available
- ☛ Environmental friendly manufacturing processes

# SUSTAINABLE MATERIALS AND TECHNIQUES

**Our commitment to sustainability is being demonstrated by meeting the rigorous standards of FSC certification through Rainforest Alliance's program, SmartWood™.**

Under this program, forest products are harvested from forests that are managed under compliance with the principles and criteria of the Forest Stewardship Council (FSC). FSC certification promotes responsible forest management and ensures that all foresting, milling, and manufacturing processes (the chain of custody) used to produce our FSC-certified cabinetry have met the most rigorous forest management standards available. Having earned this coveted product certification, you are assured of our dedication to the environment.

**Nature's Collection offers products that contribute to the overall LEED rating of your project.**

The Leadership in Energy and Environmental Design (LEED) Green Building Rating System is the nationally accepted benchmark for the design, construction and operation of high-performance green buildings. LEED promotes sustainability by recognizing performance in five key areas of human and environmental health: sustainable site development, water savings, energy efficiency, materials selection and indoor environmental quality. With LEED points being location sensitive, manufacturing takes place at our facility in central PA, so we're conveniently located for projects on the east coast, minimizing transportation costs as well as the impact on the environment. **Together we can make a difference.**

Relating to the kitchen and bath industry, some effective actions each of us can take to reduce one's negative impact on the environment are:

- 1) Educate oneself about the nature of environmental problems
- 2) Purchase energy-efficient appliances
- 3) Encourage others to share your environmental stewardship commitment
- 4) Buy environmental friendly products
- 5) Use water-saving devices
- 6) Conserve
- 7) Recycle
