LONG LASTING. Durable, functional, beautiful cabinets are finished with attention to detail... to help you complete an authentic, original dream space.

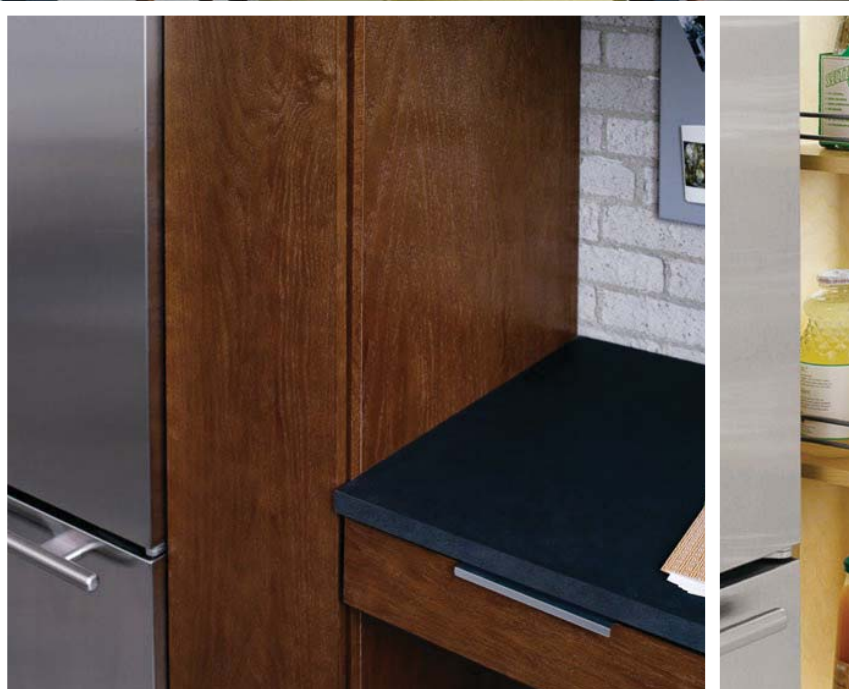

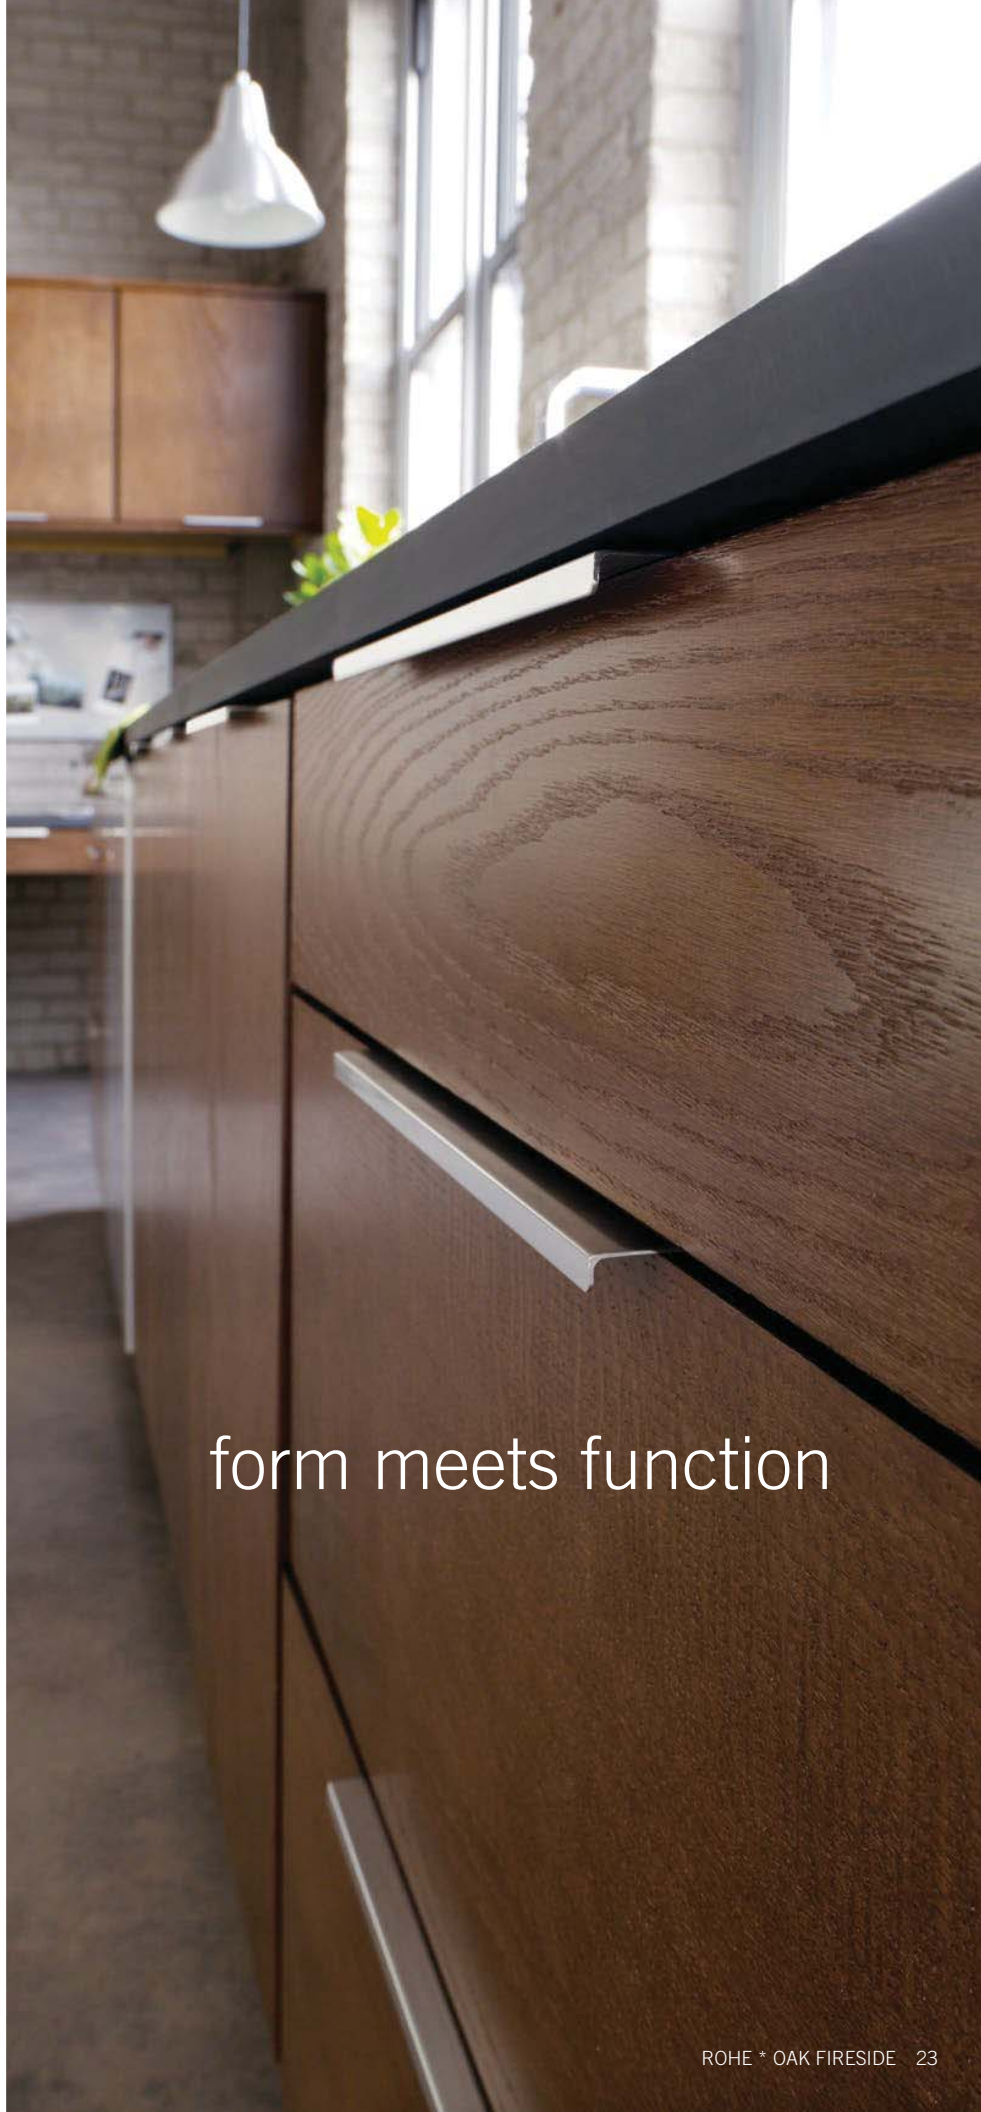

STYLING TOWARDS MODERNISM. Everyone gathers in the kitchen, so make it comfortable and uncluttered. Clean, simple lines and an open floor plan give the illusion of a larger space and the room becomes efficient and easier to maintain.

form meets function

Gray is now beating out white as a preferred color. It's more subtle and warm, and looks good with many types of countertops. It has the added BENEFIT OF COMPLEMENTING OTHER SHADES, if the trend of mixing cabinet colors is desired.

# glaze finishes

CREATING A UNIQUE LOOK

glaze over paint

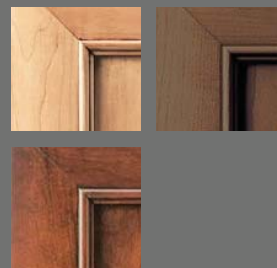

The profiles of doors, drawer fronts and large mouldings are highlight glazed by hand. The highlight glazing affects only the areas where the glaze is applied, the rest of the product does not change color.

glaze over stain

Glaze is applied over the top of the base stain and then hand wiped for a unique finish. Since glazed cabinetry is hand finished, no two doors are exactly the same.

## DOOR STYLES

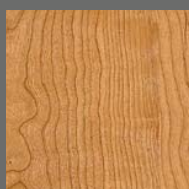

### Maple

offers a smooth, closed grain pattern, generally off-white in color with varying tones of light pink and yellow-brown. Maple contains a natural resin that causes the wood to turn amber as it ages. Painted Maple cabinetry door styles may consist of various hardwood components.

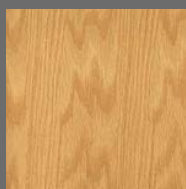

### Rustic alder

has a fine, straight-grain pattern and even texture. The color is a light brown with a reddish tinge that stains evenly. Rustic Alder includes character spots, knots, burls and blemishes which do not affect the product durability.

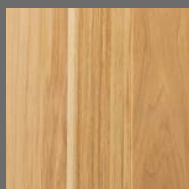

### Cherry

is a rich and multi-colored hardwood distinguished by its flowing grain pattern. Pitch pockets, checks, pin knots and sap wood all occur naturally in cherry wood. Color varies from light to deep reddish brown and will darken or mellow with age. This will be more noticeable with natural or light stain finishes.

### Oak

is characterized by its wide open grain patterns and extreme durability. Variations in grain pattern and color, small knots and pin holes are attributes of nature giving oak its distinctive beauty.

### Hickory

is known for its strength, open grain and distinctive color variation within each piece of wood. Ranging from light to deep brown, Hickory's unpredictable color spread is especially noticeable in a natural or light finish, with darker stains mellowing the variation.

### Rustic hickory

the term Rustic refers to using material that presents a more authentic country, rural feel to the cabinetry. The cabinets are designed to include a large amount of character elements in the wood.
